Opc BulletinSecurity Considerations for CCC Meetings

Reference: Memorandum from Chairman, CCC, to ADPC and ADSO,
11 March 1952; subject: "Security Considerations for CCC
Meetings"

1. OPC Division and Staff representatives present at meetings of the CCC will bear in mind at all times the fact that sensitive information should be discussed on a strictly "need to know" basis. In virtually all cases:

- a. true names of agents should not be used;
- b. precise area of operations should not be given;
- c. exact identities of groups or movements should not be revealed.

2. In presenting background statements to the Committee, documents will be sterilized so as to permit, in almost every case, a classification of "Secret".

3. Whenever the above procedure does not satisfy the sensitivity aspects of a particular project, the responsible Division Chief may request the Chairman of the CCC to handle the project personally with the minimum quorum required, which will consist of the Chairman, the General Counsel, and the Comptroller. The administrative plan in such cases will be handwritten by the Chairman. This special procedure should serve to meet the security requirements of almost all projects and eliminate the necessity for requesting the DCI to set aside CCC procedures.
